

SOLUTION OVERVIEW **DATA MANAGEMENT PORTAL**

SOLUTION BENEFITS

- + SINGLE POINT OF CONTROL**
- + REDUCED ADMINISTRATIVE COSTS**
- + REGULATORY COMPLIANCE**
- + COLLABORATE WITH PARTNERS**
- + DATA PRIVACY PROTECTION**

The Sanator Data Management Portal enables an organization to manage its provider information in a single online portal that satisfies all provider directory reporting requirements to qualified health plans.

Sanator solves the challenges faced by many provider organizations that do not have the systems to store, validate and maintain the necessary provider information required of them by their contracted health plans for roster reporting and provider directory attestation.

INTEGRATED DATA MANAGEMENT +

Sanator combines all your provider data from multiple systems and files into a single integrated database so that you can manage all your health plan reporting from a central location. Sanator clients can retire out-of-date systems, or keep them integrated with the Sanator database through our comprehensive harmonization services.

AUTOMATE ROSTER REPORTING +

Sanator automates the arduous task of roster reporting to health plans. Clients upload their health plan roster requests to the Sanator portal and await confirmation that the file has been processed and prepared for submission back to the health plan.

MAINTAIN REGULATORY COMPLIANCE +

As regulations pertaining to provider directory standards evolve, Sanator ensures that your provider database is managing all the necessary data elements and relationships. We take responsibility to follow legislation across state and federal authorities so you can focus on the business of healthcare.

COLLABORATION +

Collaborate with other organizations to verify provider profiles and to identify conflicts and changes. Sanator allows organizations to maintain control of their proprietary provider data, while sharing the burden of managing non-proprietary provider demographics and contact information.

PROVIDER DATA PRIVACY +

With Sanator you retain complete control over the distribution of your provider information. Sanator does not rely upon marketing your provider information to third-parties like other portals. Our contract guarantees that we will never sell or distribute your data without your explicit permission.
